Technical Skills   JavaScript, Python, React, Nextjs, VueJS, FastAPI, Express, AWS, Terraform, SDKs, Typescript, and more
Soft Skills   Team Leadership, People Synergy, Efficient Communicator, Energetic, Proactive

EXPERIENCE

Software Engineer   Jun 2021 - Present
Charter Solutions, Inc.   *Plymouth, MN*

- Boosted profits and productivity for an MN home builder through full stack development of VueJS app with AWS API Gateway, Lambda, and RDS, streamlining manual paperwork process for employees, agents, and clients.
- Implemented cloud-agnostic full-stack application for a large client's conveyor belt system using JavaScript, Python, AWS, Azure, FastAPI, Docker, and MongoDB, automating the product sorting process.
- Enhanced Charter's Managed Services with Datadog integration using Terraform to deploy monitors, dashboards, child organizations, and alerts.
- Created internal data lake and ingestion process for employee data reporting and storage using AWS CDK, Lambda, SQS, CloudWatch, S3, and Replicon API, enabling better management reporting.
- Developed efficient python web scraping scripts using Selenium and Pandas.
- Collaborated with stakeholders, technical teams, and senior management to communicate software product features, technical designs, and product strategy.

Full-Stack Engineer   Jan 2021 - Apr 2021
agnoStack   *Chicago, IL*

- Enhanced user experience by integrating Shippit with Bigcommerce to display real-time shipping information within agnoStack plugin.
- Improved usability by adding a color-changing status feature based on the client's eCommerce provider.
- Improved communication by creating release notes using markdown files on a Gatsby website.
- Improved customer reach by developing scripts to scrape data from public websites using Node, Puppeteer, and CSS query selectors.

Teaching Fellow   Sept 2020 - Jan 2021
Fullstack Academy   *Chicago, IL*

- Improved JavaScript skills of over 50 students through debugging, mentorship, and teaching.
- Led student projects as a technical mentor and project manager.
- Performed weekly code reviews with students.
- Improved student code quality through weekly code reviews.
- Assessed prospective students for program admission through technical interviews.

PERSONAL PROJECTS - ASK ABOUT MORE

Personal Website using React/Nextjs, with a back-end built using Lambda and deployed with Netlify/AWS CDK.

Today's Tilts NHL game stats app using CICD, React, NHL API, AWS Lambda, Route53, S3, and AWS ACM.

EXTRA-CURRICULAR ACTIVITIES

- Fly Fishing, Hockey, & family

LEADERSHIP

- Youth Hockey Coach & Coding boot camp mentor
